General Instructions

Form 42A is a by-company breakout of the numerators reported on Form 42 Part I. Apportionment Formula.

Any companies identified as “transacting business in Idaho” on Form 41A (column F) must be listed on Form 42A.

See Form 42 instructions for factor calculation details.

Specific Instructions

Enter name and federal Employer Identification Number (EIN) for each company.

Check the box for each company using three-factor apportionment.

Complete each field for each company transacting business in Idaho. The Idaho Combined Corporation Total column shouldn't exceed the sum of all companies listed on Form 42A.

The Idaho combined corporation total of Form 42A should be identical to the total of the Idaho column on Form 42. This amount should include companies using both three-factor and single-sales apportionment.

Line 10 on Form 42A is for everywhere sales use only. Don't enter an amount on Form 42A.

Line 20 Idaho Apportionment Factor.

To calculate each company's Idaho apportionment factor:

Divide each company's Idaho total (total property on line 8, total gross receipts on line 15, and total payroll on line 17) by the total in the Total column on Form 42 for each factor. Enter this percentage on line 20 for each individual company.

Add each company's Idaho percentage (as calculated above) for the Idaho Combined Corporation Total column.
