COMMON ISSUES AND ERRORS

It is the responsibility of the Vendors, Developers and/or Practitioners and the Client/Taxpayer to see that correct information is located on the form before distribution and/or filing. If the information is not found, the returns are not to be filed, submitted in for testing, or distributed to end users. Specific information is required to be printed on the form to process the return through our scanning equipment and software.

Without this information the returns will not process and will be sent back to the taxpayer. Also, without this information the system is unable to link page 1 with page 2 to indicate a complete return has been filed.

2021 Filing Issues

- Schedule S, Schedule CR, Schedule A
 - **Being filed with K-40H**
 - **CANNOT DO**
 - **CANNOT** be filed with any other return
 - **K-40 ONLY**
 - **CANNOT** be filed by itself
 - **Unless K-40 has already been filed**
 - **Filing an Amended K-40**

Common Errors

- Reproducing drop out ink forms to be filed as vendor form
 - This is not allowed as placement is different
 - Whether in
 - Black and white or
 - Color
 - Form IDs are unique to each return / voucher
 - Form ID tells system
 - What return / voucher it is and
 - What view / screen to bring up for internal user
 - Placement from color to black and white are not the same
- Forms for testing purposes are coming in formatted correctly but when filed not so much
 - Missing complete date fields
 - Missing EINs
 - Numeric data in alpha fields
 - Voucher printed correctly except for scanline printed on voucher upside down
 - Wrong Form id's
- Returns being filed with 0's in what would be considered blank fields
 - Fields that are not applicable
 - Leave Blank
 - DO NOT fill blank fields with 0's
- **K-40**
 - Filing only one page of Form K-40 (2-page return)
 - Increases the number of partial returns sent back to the taxpayer
 - Causes delay in processing of return
 - Causes delay in getting refund(s) out
 - Impacts read rates
 - Returns are being received with MFJ marked but the spouse info has not been completed. This is information required to process the return.
- **Sch CR**
 - Filing Sch CR with the KDOR's color return is **not allowed**
 - There are only 2 ways to file this schedule
 - With vendor paper return using software
 - Filed electronically
 - Filed any other way is **not allowed**
 - Credits will be voided

- **Scaling**

- Live returns that are scaled down
 - Causes delay processing
 - staff will need to manually enter info
 - for testing, the forms will have to be resubmitted
 - Need to inform taxpayers of setting

WHAT'S NEW, OBSOLETE OR CHANGED FOR 2022

Filing Due Date

Due date for tax year 2022 is **April 18, 2023**. Taxpayers will have extra time to file and pay income tax because **April 17th** (Actual Emancipation Day) falls on a **Sunday** and **Monday, April 18** is the observed legal holiday in D.C for Emancipation Day. By law, filing and payment deadlines that fall on a legal holiday are timely satisfied if met on the next business day. Under a federal statute enacted decades ago, holidays observed in the District of Columbia have an impact nationwide, not just in D.C. the IRS follows D.C.'s holidays for filing purposes and Kansas follows the IRS.

- Graphics or special characters cannot be used as part of the data when entered. Any characters needed with data will be hardcoded on the form itself. No leading zeros unless requested.
- Registration marks and form identification: Registration marks and the form identification, which are printed on each page that is scanned, cannot deviate from the ones used in the design of the form.

SCANLINE CONTENT AND PLACEMENT

Refrain from placing text anywhere within open areas.

The following information is to show what data is required in creating a scanline depending on the form and tax type:

- **K-40V** Form ID + Tax Year + Primary 4 Character + Primary SSN + Spouse 4 Character + Spouse SSN
- **K-41V*** Form ID + Tax Year + EIN + EIN + Beginning Date + Ending Date
- **K-120V*** Form ID + Tax Year + EIN + EIN + Beginning Date + Ending Date
- **K-130V*** Form ID + Tax Year + EIN + EIN + Beginning Date + Ending Date
- **K-40ES** Form ID + Tax Year + Primary 4 Character + Primary SSN + Spouse 4 Character + Spouse SSN
- **K-41ES*** Form ID + Tax Year + EIN + EIN + Beginning Date + Ending Date
- **K-120ES*** Form ID + Tax Year + EIN + EIN + Beginning Date + Ending Date
- **K-130ES*** Form ID + Tax Year + EIN + EIN + Beginning Date + Ending Date

* Dates within the scanline must match those found in date line above the business name.

For clearance on the left and right edges of scanline it will vary depending on form or tax type. The measurements provided are from the left and right edge of the voucher:

Form Name	Print Position left side	Left edge of scanline to left edge of voucher	Right edge of scanline to right edge of voucher	Print Position right side
• K-40V	37	3 9/16"	1 21/32"	68
• K-41V	33	3 5/32"	1 21/32"	68
• K-120V	33	3 5/32"	1 21/32"	68
• K-130V	33	3 5/32"	1 21/32"	68
• K-40ES	37	3 9/16"	1 21/32"	68
• K-41ES	33	3 5/32"	1 21/32"	68
• K-120ES	33	3 5/32"	1 21/32"	68
• K-130ES	33	3 5/32"	1 21/32"	68

All scanlines must be printed 1/2" from the bottom edge of the voucher. From bottom edge of scanline to edge of paper must be a 1/2" no more, no less. All scanlines are required to be placed on Line 63. This measurement equals 3-line positions. On vouchers no additional text should be placed on lines 61-66 unless already approved.

No text of any kind can be printed anywhere in the area shown above or below print Line 63 to the edge of the voucher (left, right or bottom edge).

SDC NUMBERS AND FORM ID'S

Refrain from placing text anywhere within open areas.

The software developer identification code (SDC) is a Kansas three-digit number that will be assigned to each developer (one per company) by the Kansas Department of Revenue. If you developed Kansas forms last tax season, the same code would continue to apply. If you are new to producing Kansas forms, one will be assigned, and you will receive an email indicating the number. All scannable forms must have your Kansas assigned vendor number. See grid for placement. A ½" of open space must be maintained on all four sides of the code. Companies that did not submit income tax forms for the current year, or only do sales, use or withholding taxes (as they are required by Kansas law to file electronically) are not listed below.

FORM IDENTIFICATION NUMBER (Kansas Form ID) Refrain from placing text anywhere within open areas.

A form ID is assigned to each return and on each page of that return and voucher that has required software and data placement or needs to be identified for order of forms. This form ID is required to be printed on all scannable and nonscannable forms for identification in the system and manually.

1. Form ID
 - a. System will reject not only return but entire packet if
 - i. missing
 - ii. it belongs to a Dept form
 - iii. it belongs to another software form
 - iv. year is incorrect within Form ID
2. Administrative Assistants
 - a. required to manually identify form
 - b. must resend through scanners to complete the system process
 - c. manually having to enter information delays processing
 - d. manually having to enter information delays getting refund sent out

We understand that it is costly to send out fixes, but it is also costly for users who could incur P & I or at the Dept's end to have extra manpower brought in to manually fix forms that could have easily gone through the system. This can also apply to not sending in the correct pages for processing or having the name and SSN missing and mailing them all back to the taxpayers, you incur added cost of manpower and postage.

The form ID can change from one year to the next. A ½" of open space must be maintained on all four sides of the form ID. The actual locations of the form ID's are shown on the grid(s) for that form type. The form identification number is a six-digit number that identifies the type of form and which tax year it is for.

All the scannable forms and vouchers listed below are tax year specific. Not only does the form ID specify the tax year but the year will be on the form and/or voucher in the scanline. The following form ID's will be used for **2022-2023**.

Return – Voucher Name	Page 1 Form ID	Page 2 Form ID	Page 3 Form ID	Page 4 Form ID	Page 5 Form ID	Page 6 Form ID	Page 7 Form ID

* Please note that the form identifier is built into the scanline on the vouchers and includes the last two digits of the tax year from the period ending date. The equipment used does not recognize the identifiers as used on the other forms but does recognize the two-digit tax year.

REFERENCE/TAG MARKS

Refrain from placing text anywhere within open areas.

The height of the tagmarks for **returns** is 2 print lines tall and 3 print positions wide (returns). Sample below:

GENERAL REQUIREMENTS

Letter of Intent - LOI

A **NEW** "Letter of Intent" is required to be completed at the start of each tax season. The Letter of Intent (3 pages) is part of Pub. KS-1648 and the LOI will be posted to the FTA SES site sometime in June. Please email your completed "LOI" no later than **August 31, 2022**. Once made final the rest of the Pub. KS-1648 will be posted by mid-August.

The Letter of Intent must be received prior to and / or with the first group of tax forms submitted for testing. If forms are submitted prior to receiving the LOI, they will be held until it has been received by the Kansas Department of Revenue. The enclosed "Letter of Intent" is for the **2022-2023** tax filing season. Do not use a prior year Letter of Intent as some forms maybe added or removed.

The page information after the title of the form indicates how many pages the Kansas Department of Revenue considers the actual size of each form. For some forms only the first 2 pages or the 1st page is scannable but if there are 4 or 6 pages to the form, **ALL PAGES ARE REQUIRED TO BE SUBMITTED FOR APPROVAL AT THE SAME TIME. IF THEY ARE NOT WHAT HAS BEEN SUBMITTED WILL BE DENIED.**

Anyone can reproduce the Kansas tax forms (scannable & non-scannable) but all must go through an approval process.

Decedent Check Field

When completing any of the 3 forms (K-40, K-40H, or K-40PT) for a Decedent, the check field on these forms is required to be marked and the death date completed. Returns are being received that:

- **RF-9 is included** but
 - a. do not have the decedent field checked,
 1. the decedent death date is completed or
 - b. do have the decedent field checked,
 1. the decedent death date has not been completed
- **RF-9 is not included** but
 - a. do not have the decedent field checked,
 1. the decedent death date is completed or
 - b. do have the decedent field checked,
 1. the decedent death date has not been completed

They will be received with the field marked along with a death date but no RF-9 or receive a RF-9 but the field is not checked, or death date is missing. Form RF-9 is required to be filed whenever either of these fields are completed.

The returns and this form need to be linked together when this information is completed on the returns. If the RF-9 is completed first it should automatically mark the fields on either of the forms matching with the date entered on the RF-9.

Dependent Information – K-40, K-40H, & K-40PT

NO “**Dependent Information**” is to be placed on a separate sheet until the lines on page 1 of forms K-40, K-40H, or page 2 of the K-40PT are completed. A listing of dependents on a separate sheet can only be created if the 12 lines on the K-40 or seven lines on the K-40H or 15 lines on the K-40PT have been completed first. If there are no dependents, this area should be skipped.

This is required information and must be completed in the appropriate fields. No exceptions will be allowed. If there are dependents and these fields are not completed, the exemptions/credits being claimed will be automatically denied on the spot.

For Software Paper Filers_K-40 & K-40PT - If a dependent child dies before a SSN is applied for, do not enter “DIED”, “APPLIED FOR” or leave blank. **In this circumstance only**, you can enter nine “000000000”. If a child or adult passes away before a SSN is issued, they can be claimed as an exemption but are not eligible to be claimed for any of the credits such as Food Sales, EIC, child care or any other credit without a valid SSN. So, 9 zeros’ (000000000) can be entered on the return but any claim to credits will be denied.

Our system is set up to verify the dependent information, to insure they are entitled to the number of exemptions and credits claimed. If this is not completed on the return the validation process cannot be completed. Instead of having the system validate the information, an associate will now be required to manually touch each return and dependent information to verify their SSN. **This can / will add an additional 8 – 12 weeks to the process time.**

Full Fields – Test Forms

A full field is not a form completed with all 0's, X's, a jumbled array of letters/numbers, and/or all 9's, a combination of both or any other single letter or number. If the form is only completed with one single character or digit, the equipment and software used to process the form(s) will not be able to acknowledge any of the fields. Nor can the equipment acknowledge any of the fields when alpha is used in numeric fields and numeric used in alpha fields. If test samples are submitted in either format the system will reject the forms.

All scannable forms provided by the Kansas Department of Revenue for reproducing are completed with full data fields. Each field is completed with the maximum length of data for that field and shows how the format for the data should appear, including whether a money field can be a negative or not, commas, dollar signs, etc. When submitting a full field return / voucher, use the data that is provided within the pdfs. A voucher is not like a return that you can send multiple samples through to cover all the check fields.

Money Fields on Test/Actual Returns

NON-APPLICABLE MONEY FIELDS **MUST BE LEFT BLANK.**
DO NOT PROGRAM SOFTWARE TO FILL NON-APPLICABLE FIELDS WITH ZEROS.

Test Forms – Money fields are not tested to validate the calculations but to make sure the placement of that data is in the correct location. For testing of placement all fields that your company supports are required to be populated.

Actual Returns/Forms – Money fields on the actual returns/forms must be validated (internally by the Software Developers prior to the release of their software) to make sure each field is calculating correctly. The validation is not only on the return itself but also when figures must be carried over from other forms. Scannable and non-scannable forms must have their calculations validated. If a non-scannable form has calculations that need to be carried over to the scannable return, that data must be validated so that the correct figures are brought over. The Kansas Department of Revenue cannot conduct this test as the software is not submitted for review.

Non-Applicable Fields – When your software is used to complete a return, not every field will apply to that individual, in those cases **DO NOT ALLOW THE SOFTWARE** to pre-fill fields that do not apply. The software should NOT be designed to allow it. **Leave those fields blank** unless otherwise instructed. This applies whether you are filing paper or electronically.

Taxpayer/Preparer Signature Area & Information

Refrain from placing text anywhere within open areas.

No red, orange, yellow, purples or shades of red ink are not to be used when signing the return, whether **the taxpayer(s) or the preparer**. ALL signatures should be in **blue** or **black** and legible.

Taxpayer Area

Located on each return is an area for the taxpayer or claimant's signature, as well as the signature of the spouse and tax preparer, if applicable. The locations of the signature lines are shown on the grid(s) for the income, corporate, and privilege tax forms. The grid(s) show the placement of all areas read and not read by the system. If filing a joint return both signatures are required. If only one signature on the return it will be sent back.

Paid Preparer Information Area

If the return has been completed by the taxpayer and NO preparer was involved there should be no signature or comment printed, **Self-Prepared** in this area. This field/line should only be populated if a preparer completes the

return otherwise it is **required** to be left blank. If not left blank, ICR reads that there is a signature, when really there was no paid preparer. Manual intervention is required to change all of these to “N” (no).

If the return has been completed by someone other than the taxpayer then the preparer must complete the tax preparer information. Enter the preparers’ phone number, PTIN, EIN, or SSN number. The phone number and one of the 3 identification numbers must be entered on the return. **If the Preparer has a PTIN it is required to be enter over the other two options**, then the EIN and SSN as a final option. DO NOT add the preparers’ address. This information is not needed nor is there space for it.

Tax Account Number and Data Information Format

Applied for Accounts

The following rule applies to all documents – full, ¾ and voucher size being filed:

“There is no reason for these fields to be blank when a return and/or voucher are filed.”

Full and ¾ Size Forms

For the data fields within the full and ¾ size documents:

- 99% of all filers should have an SSN and/or EIN number. For those filers that field should never be blank.
 - a. The other 1% should enter “APPLIED FOR” in this field
- For income, corporate, privilege, franchise, and fiduciary the example for the “Account” number, “EIN” and “SSN” fields the following text can be used: “APPLIED FOR”

Voucher Size Forms

For the data fields within the voucher size documents (not scanline): If the account number is an “Applied For” or not known, the data below is all that should appear on the voucher.

- 99% of all filers should have either an SSN and/or EIN number. For those filers that field should never be blank.
 - a. For the other 1% “APPLIED FOR” should be entered in this field
- For income, corporate, privilege, franchise, and fiduciary the example for the “Account” number, “EIN” and “SSN” fields the following text can be used: “APPLIED FOR”

For the data fields within the scanline: If the account number is an “Applied For” or not known, the data below is all that should appear in the scanline.

- The scanline on income, corporate and privilege the following example should be used for the SSN and EIN:
000000000

Tax Account Numbers

A software developer cannot arbitrarily issue a Kansas tax account number. Returns and payment vouchers are being received with account numbers that were not issued by the Kansas Department of Revenue. Tax account numbers can only be issued after completing the CR-16 Business Tax Application (<https://www.ksrevenue.org/pdf/cr16.pdf>) or completing the online application (<https://www.kdor.ks.gov/Apps/kcsc/login.aspx>)

Non-Applied for Accounts – Single Filers: For the data fields within the voucher size documents (not the scanline) – K-40V and K-40ES

If there is no spouse – Leave blank – Spouse Name field Spouse Name control Spouse SSN

For the data fields within the scanline – K-40V and K-40ES

- Primary Taxpayer and Spouse “Name Control” – If name is less than 4-char
 - **If last name is less than 4 characters, the 4-char should be formatted as “FOX0” or “LU00” or “A000”. The blank field should be a zero “0”. No more blank spaces in the scanline.**
- Spouse “Name Control” – If no spouse:
 - “XXXX” should be used in the four-character name field and in the scanline if filing individual
- Spouse “SSN” – All “000000000” should be used in the social security field and in the scanline if “Primary” is filing as individual

Format for Date Fields – only ones acceptable

The following are examples of how dates can be entered on the returns and vouchers. There are two standard formats that are commonly used:

- 6-digit format – 090922
- 8-digit format – 09012022

Actual Filings – Variable and Hardcoded Data

Refrain from placing text anywhere within open areas.

The information provided on **pages 11 - 15** and throughout this publication are to be used along with the grid(s) for accurate placement and format. The forms/vouchers, data/text placement grid(s) can be obtained on the FTA SES site for Kansas.

All data examples in this publication and on the grid are just that, an example of how the data should look. Data shown on the grid(s) are samples of full fields and should be used when creating full field test samples. If any monetary amount can be a **negative** each sample tax return and or tax voucher pdf posted on the FTA SES website will show which fields can be a negative. Not all monetary fields allow for a negative. If it is a negative a “-” will be indicated in front of the amount.

All grid(s) will show the placement for literally everything that appears on the forms: the text, data, and the amount of open space that must be left between them. A column of text will all end in the same print position. (See section “Open Space” found on **page 25**.) For example, if the grid shows 4 open spaces between the text and where the data starts then the sample submitted for approval must also have 4 open print positions between text and data.

This space must be adhered to. Any return or voucher that is filed by your customer/client that does not follow the requirements can and should expect a delay in the processing of their documents. When returns or vouchers are being filed by you or your clients, fields that do not apply are NOT to be prefilled with data. Fields that do not apply are to be left blank.

FORM K-40 IS A TWO-PAGE RETURN & IS REQUIRED TO BE FILED AS SUCH

If a sample is not received this way, one will be requested, and the form will not be tested until then. This is required for testing purposes on the chance the form(s) will come in with this field populated. The sample **MUST** contain variable data printed on the form to insure proper testing of the forms. All data examples in this publication are just that, an example of how the data would look not actual data.

If a sample is not received this way, one will be requested, and the form will not be tested until then. This is required for testing purposes on the chance the form(s) will come in with this field populated. The sample **MUST** contain variable data printed on the form to insure proper testing of the forms. All data examples in this publication are just that, an example of how the data would look not actual data. When submitting test samples:

1. **All** test samples (full fields or valid/realistic) are **required** to contain the correct data format as required in the data specifications. **This means no alpha in a numeric field or numeric in an alpha field.** When submitting a full field form please use the data on the pdf samples supplied to you.

2. All fields must be completed (not all 0's, X's or 9's) **AND** for filing original returns, fields that do not apply are not to be pre-filled with 0's. Original forms are being sent in with fields populated with 0's. This bullet is listed with each tax type on the previous pages:

Money fields – Do not prefill money fields with zeros in those fields that are not applicable. Please follow the specifications found within this publication.

On all spec'd forms, the amount of **open space** around the "data" entered, in relation to the text, must be maintained throughout the forms. All grid(s) show the placement for the text, data, and the amount of open space that must be left between them. If the grid(s) shows six open spaces between the text and where the data starts, then the sample submitted for approval must also have six open print positions between text and data. See grids on the amount of "Open Space" from hardcoded text to data per form type. **Example** shown below:

If any monetary amount can be a **negative** each sample tax return and or tax voucher pdf posted on the FTA SES website will show which fields can be a negative. Not all monetary amounts are a negative. If it is a negative a "-" will be indicated in front of the amount. Any return or voucher that is filed by your customer/client that does not follow the requirements can and should expect a delay in the processing of their documents.

On the FTA SES website click on each form for the data specification containing forms and grid(s) to know how much open/clean space must be allowed. Even though the text is not read, the open space between it and the data is required for the system to read the data accurately and consistently. **Refrain from placing text anywhere within open areas.**

[^] **New forms** (These were available at time of posting. If more are added, the LOI will be reposted)

+ Form 200 is not K-200 or KS-200

*** Forms that have no changes will not be posted on the FTA SES. Once you have sent in your LOI and the first scannable form, I will add to the approval list those forms with no changes. Your approval from 2021 will still be good for 2022 regarding nonscannable forms listed above.**

Quite a few of the credit schedules can no longer be claimed when filing a K-40 (see Sch CR) but can still be claimed when filing K-41, K-120, K-120S or K-130 (see each specific form) or can be used for carryforwards only.
