Introduction

The following pages include 11 ATS test scenarios and a list of the line items to be completed for each test. The line numbers listed in the table for each scenario are for the Form 2 . The data submitted for the indicated lines will be determined by the developer, except where specifically noted. The lines listed are the minimum amount of information we expect to see on the return.

Our testing environment will be available for developers to submit returns against to test reject codes, communication, acknowledgements or other reasons. MT DOR will not review any returns until we receive an email at DORMeFTest@mt.gov with all of the required information submitted.

Testing Deadlines

Initial submissions for Form 2 testing must be received by **December 15, 2023** and the testing completed by **January 16, 2024**.

In some instances, the email with the test returns will not make it through to the DORMeFTest mail box due to size limits or firewall constraints. If you're having trouble with emails, there is the option of sending your files securely through ePass Montana at transfer.mt.gov. Contact DOR QA at DORMeFTest@mt.gov for more information.

Submitting ATS test cases

After you have received an acceptance acknowledgment from MT DOR for each of the test submissions

You will receive an email when your submission has been assigned a tester. Reviews will be completed, generally, within 5-7 business days from the date a tester was assigned.

When the review is complete, MT DOR will send the submitter a test summary document Identifying any needed corrections. After all corrections are made by the developer, ATS test cases can be resubmitted for review.

Test Scenarios

This document includes eleven (11) test scenarios.

Each test scenario will include the line item that should be completed for that test scenario. The line item corresponds to Form 2.

Some line numbers are followed by 'P', 'S' or 'P/S', indicating who should be represented in the filing;

'P' indicates primary filer

'S' indicates spouse

'P/S' indicates both primary and spouse.

There are some instances of testing negative values. The lines for a negative value will be bolded in red.

The line numbers indicated in these test scenarios are the minimum amount of information expected.

Any additional information can be tested as well.

NOTE: Data submitted for the lines indicated will be determined by the developer unless otherwise noted.
