Reminders

Individual Income Tax

- Amended SC1040 with Sch. AMD – On the Sch. AMD, Amended Return Schedule, checkboxes must be marked to let us know the reasons the return is being amended. An explanation of the changes must also be included. Without this information, the return is considered incomplete, resulting in delays in return processing for your customers. It also increases the chance that your customer will be sent a letter requesting additional information.

Corporate Income Tax

- For a tax account to be closed with the SCDOR, the final return must be marked to notify us that the corporation is closed and that no future returns will be filed.
- Limit the use of tax period overrides for payments and returns. These overrides often result in payments being misapplied and general delays in processing.

Programming Preferences

- Payments included with MeF submissions should default the payment withdrawal date to the same day as the return transmission date unless the taxpayer specifies otherwise.
 - We recommend that you do not default payments to May 1.
